Feature Release - July 2026

This article highlights the NEW features and enhancements released by Qargo this month.

Updated 5 August 2026

Week 1

📱 Mobile — Cross-Dock: Free-Scan Validation by Planning Group and Order Status
📱 Mobile — Cross Dock: Depot-Aware Barcode Resolution Across Multiple Depots
📊 Orders — Sort and Filter the Revenue, Cost, and Profitability Columns
🗂️ Dashboard - Container-Trailer locations count dashboard
📋 Planning — Previous & Next Intermodal Connection Columns

Week 2 - Rates Update

🎨 A redesigned Rates module
⏱️ Rates — Waiting hours now has its own dedicated surcharge category
💰 Rates — New calculation method: Percentage of charges
🧮 Rates — Rounding on rate card calculations, explained
💰 Rates — Consolidate order revenue on the same trip
💰 Rates — Split revenue by planning group or resource group

Week 3

💰 Invoices — Period Closing
🧩 Orders/Trips/Invoice — Reorder & Hide Detail Page Sections
🔎 Orders — All Dates Filter on List Views
🗓️ Trips — Sort & Filter the Trips List by Requested Date
📋 Planning — Extra Columns on the Intermodal List View
📄 Tasks — Generate & Send Documents in One Step

Week 4 - Planning update

🔎 Planning — Collect/Delivery column on To plan: Orders
🕒 Planning — Time window columns on To plan: Orders
📦 Planning — Cargo columns in the Trip Groups overview
⏱️ Planning — Update arrival and departure times of in-progress stops
🔀 Planning — Confirm before moving an intermodal leg to a different shipping lane

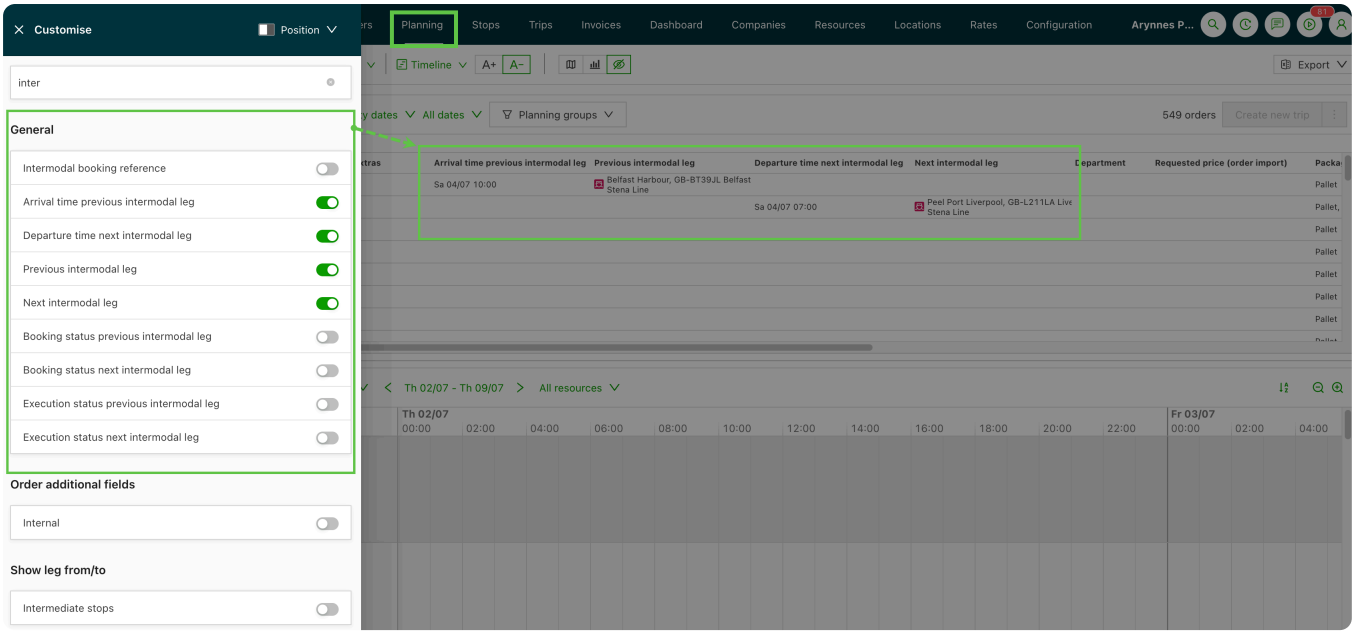
Container-trailer locations dashboard

📋 Planning — Previous & Next Intermodal Connection Columns

Intermodal timing, locations, and operator statuses are now visible directly in the planning view without opening individual orders. Eight new opt-in columns show the previous and next intermodal legs with departure/arrival times, locations, booking status, and execution status - all sortable and filterable.



What's included:

- Arrival time, location, and operator of previous intermodal leg
- Departure time, location, and operator of next intermodal leg
- Booking and execution statuses for both connections
- All columns sortable and filterable
- Available in the Planning → To plan: Orders view via Edit columns

Intermodal planning – Using Previous & Next connection columns
