A4 labels

How to work with palletline A4 self-adhesive and non-self-adhesive labels

Updated October 24, 2024

Operational workflow

Palletline offers the option to print A4 labels in case customers don't have Zebra printers.
The customer must be configured to use A4 labels:

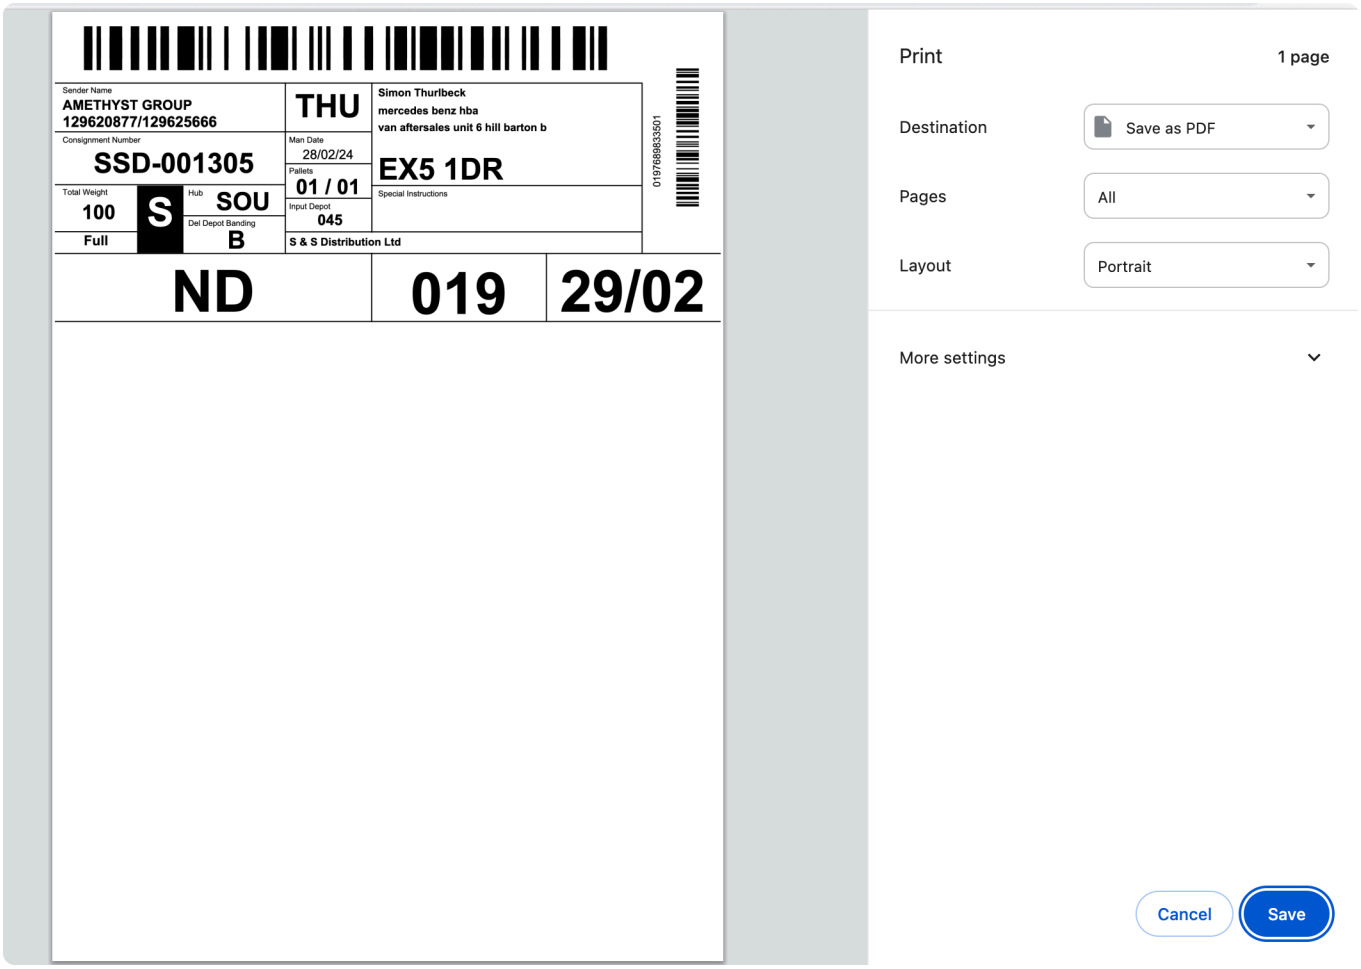

The customer then gets A4 labels generated. These need to be printed horizontally.

- Example label

- Print horizontally (portrait layout):

The labels can then be bought in the palletline webshop:

Customer Implant Labels for GK420d	Roll of 300
Track and Trace Labels	Roll of 1000 (Box of 4)
Glasgow Hub Labels	Roll of 1000
ZD421D (USB only)	Each
ZD421D (USB and Ethernet)	Each
A4 Laser Labels	500 Sheets / 1500 Labels

The following can then be bought:

- Option 1: Customer implant labels – Thermal rolls of labels for a Zebra printer
- Option 6: A4 laser labels – Self-adhesive, 3 per page. Exact size of a palletline label for non-ADR freight

These can be sent to customers to label their freight.

Configuration (contact customer support for this)

The following additional field must be configured on the customer:

- Name: Palletline A4 label
- Type: Toggle
- Always show: active
