Northern Ireland shipments

Updated April 27, 2026

Shipments going to Northern Ireland have some specific data requirements. These apply to all shippers that move goods to or out of Northern Ireland. The data is filled in at the order level and is filled in automatically for imported orders.
These fields are:

- `Description`
- `Company Name`
- `GBEORI` (an **Economic Operators Registration and Identification Number for UK**)
- `TSS Registration` (Trader Support Service registration number)
- `TSS Job Reference` (Trader Support Service job reference)

As with the Amazon custom fields, these fields are added as custom fields at the order level, all as text fields, and are visible there:

- `northern_ireland_t_ss_registration_job_reference`
- `northern_ireland_description`
- `northern_ireland_t_ss_registration`
- `northern_ireland_company_name`
- `northern_ireland_GBEORI`
