# Charge template FAQ: updated rate shows incorrectly in order

The rate in a charge template was updated, so why is the rate wrong in a new order?

Updated July 10, 2026

Once a template is linked to a rate card, any updates to the template must also be updated in the rate card. Any discrepancy is shown by the label **'Differs from template'**.

To resolve this, click the ***'Restore calculations'*** link. This updates the price list to match the latest version of the template. If the price doesn't update in the order, use the **'recalculate'** link.
