Feature release July 2025

This article highlights the new features and enhancements released by Qargo this month.

Updated February 20, 2026

Week 1

Configuration: Email load contacts
Configuration: Split revenue enhancement
Qargo mobile app: Driver scan pickup/delivery
Orders: Enhanced date filters

Week 2

Orders: Add additional stops to Owned and Sea container orders
Rates: Rate based on number of pickups or number of deliveries
Integrations: WhatsApp driver messaging
Resources: CO2 emissions support for electric vehicles
Invoices: Create similar invoice
Configuration: Print directly from Qargo
Orders: Upload multiple documents at once

Week 3

Update: Qargo can take care of the Peppol workflow
Qargo Network: Support more stop activities

Week 4

Invoices: Customize invoice default date
Configuration: New table views for products, surcharges and more

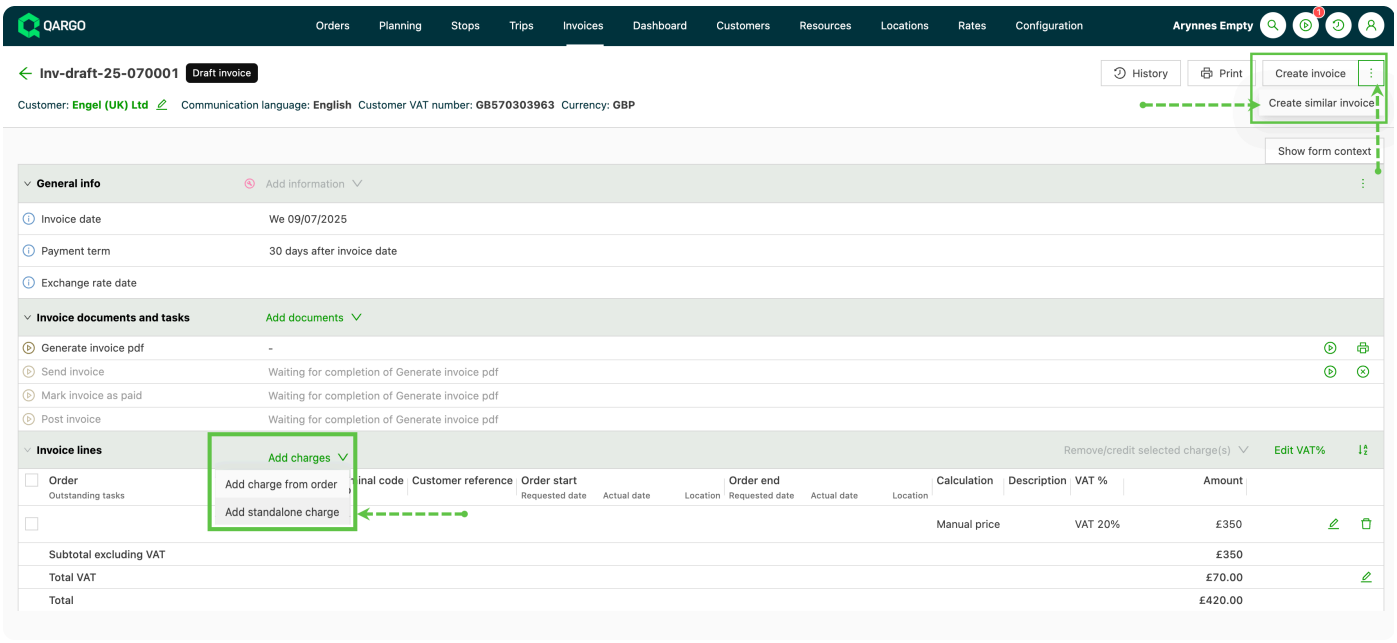

Week 5

Qi: Smarter, more accurate AI for order creation from confirmation documents
Bulk update details via 'Quick actions'
Customer portal: Invoice charge visibility and approval function
Invoices: New invoice status for improved workflow

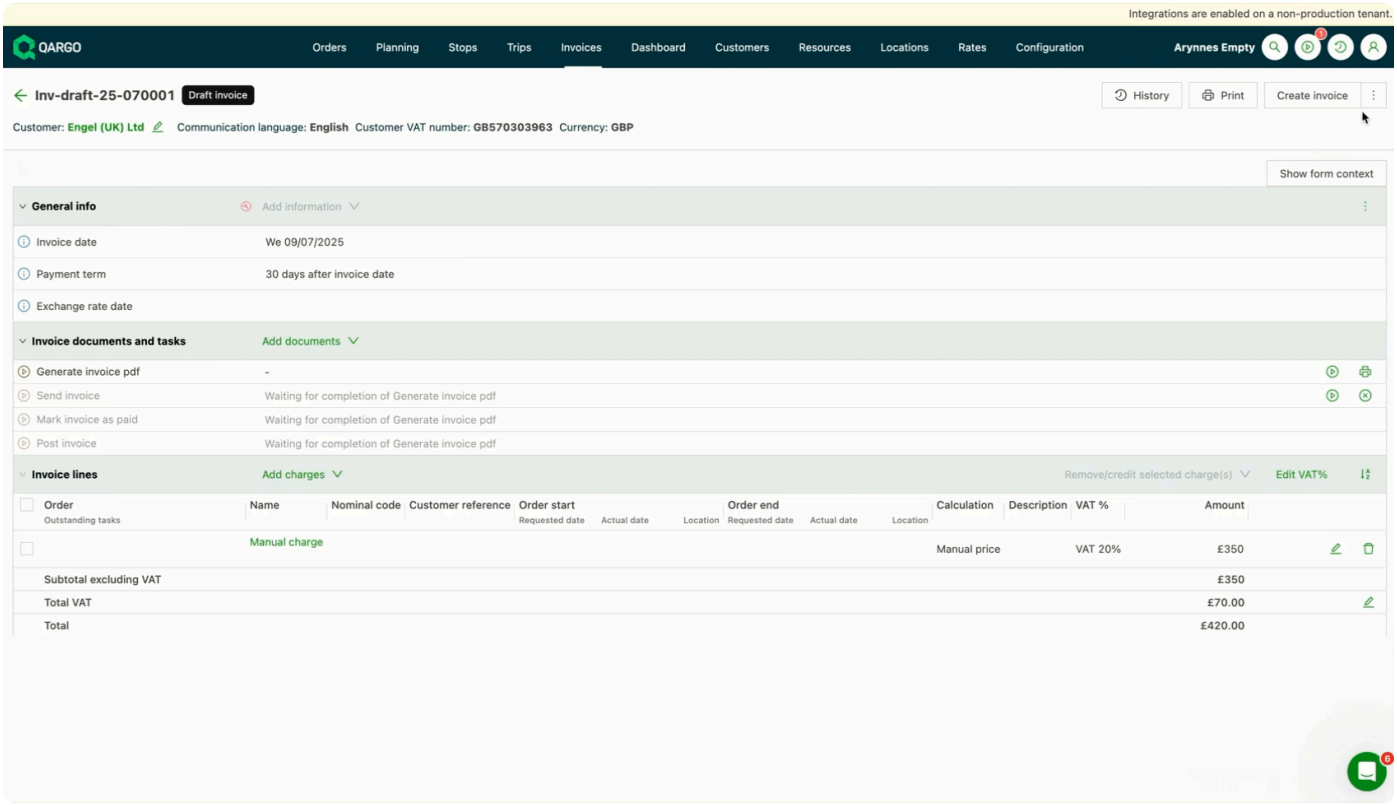

▶ **Week 1**

▶ **Week 2**

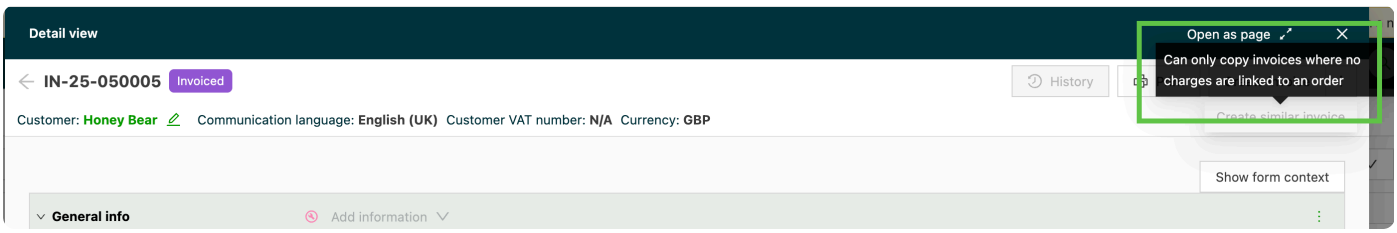

From the invoice, click the hamburger menu (three dots) to display the **Create similar invoice** option.

The new invoice is created with the Draft status.

If the option is not available for the invoice, it is grayed out and a warning is displayed.

Configuration: Print directly from Qargo

No more downloading documents to the computer just to print them. Documents can now be printed directly from Qargo to local printers, saving time and removing the hassle of managing downloaded files.

🎯 **Smart printer assignment**

Configure different printers for different document types. Set the accounts office printer for financial documents and the planning office printer for operational documents, automatically.

⚡ **Easy printing**

Print documents directly from order lists, task views and document details with a single click.

🔧 **Flexible configuration**

- Add multiple printer configurations
- Set default printers for specific document types
- Customize print settings (copies, color/grayscale)
- Quick re-trigger and reprint options

Where to find it:

- **List view pages**: New print options alongside the existing download functionality. Quick-action print button for task documents
- **Order details**: Instant print icon for immediate document printing
- **Task execution**: Choose between download only or printing directly

FAQ – Print documents in Qargo

Orders: Upload multiple documents at once

Save time by adding all needed documents to the order in one screen! When uploading documents to an order, it is possible to select multiple documents.

- Select multiple documents of the same document type
- Upload different document types at the same time
- Use the description to define the same document type
- Also available in the customer portal :::

▶ **Week 3**

If the stops are added after the load has already been planned to the contract carrier and sent over the Network, the **Outsource to Network** task sends the update to the contract carrier account.
