Video: using Qargo on a mobile phone

Qargo in a mobile phone's web browser is a solid quick reference tool for looking things up. It is not designed for creating, planning, or editing. For those tasks, a computer is still the right tool.

Updated June 3, 2026

This video explains how Qargo works in a **mobile phone's web browser**:

This is not the Qargo app, but the website app.qargo.com on a mobile phone.

For more information about the Qargo app, see this collection.
