Feature release – July 2026

This article highlights the new features and enhancements released by Qargo this month.

Updated August 5, 2026

Week 1

📱 Mobile — Cross-dock: free-scan validation by planning group and order status
📱 Mobile — Cross-dock: terminal-aware barcode resolution across multiple terminals
📊 Orders — Sort and filter the Revenue, Cost, and Profitability columns
🗂️ Dashboard — Container-trailer locations count dashboard
📋 Planning — Previous & next intermodal connection columns

Week 2 – Rates update

🎨 A redesigned Rates module
⏱️ Rates — Wait hours now has its own dedicated surcharge category
💰 Rates — New calculation method: Percentage of charges
🧮 Rates — Rounding on rate card calculations, explained
💰 Rates — Consolidate order revenue on the same load
💰 Rates — Split revenue by planning group or resource group

Week 3

💰 Invoices — Period closing
🧩 Orders/Loads/Invoice — Reorder & hide detail page sections
🔎 Orders — All dates filter on list views
🗓️ Loads — Sort & filter the Loads list by requested date
📋 Planning — Extra columns on the Intermodal list view
📄 Tasks — Generate & send documents in one step

Week 4 – Planning update

🔎 Planning — Pickup/Delivery column on To plan: Orders
🕒 Planning — Time window columns on To plan: Orders
📦 Planning — Freight columns in the Load groups overview
⏱️ Planning — Update arrival and departure times of in-progress stops
🔀 Planning — Confirm before moving an intermodal leg to a different shipping lane

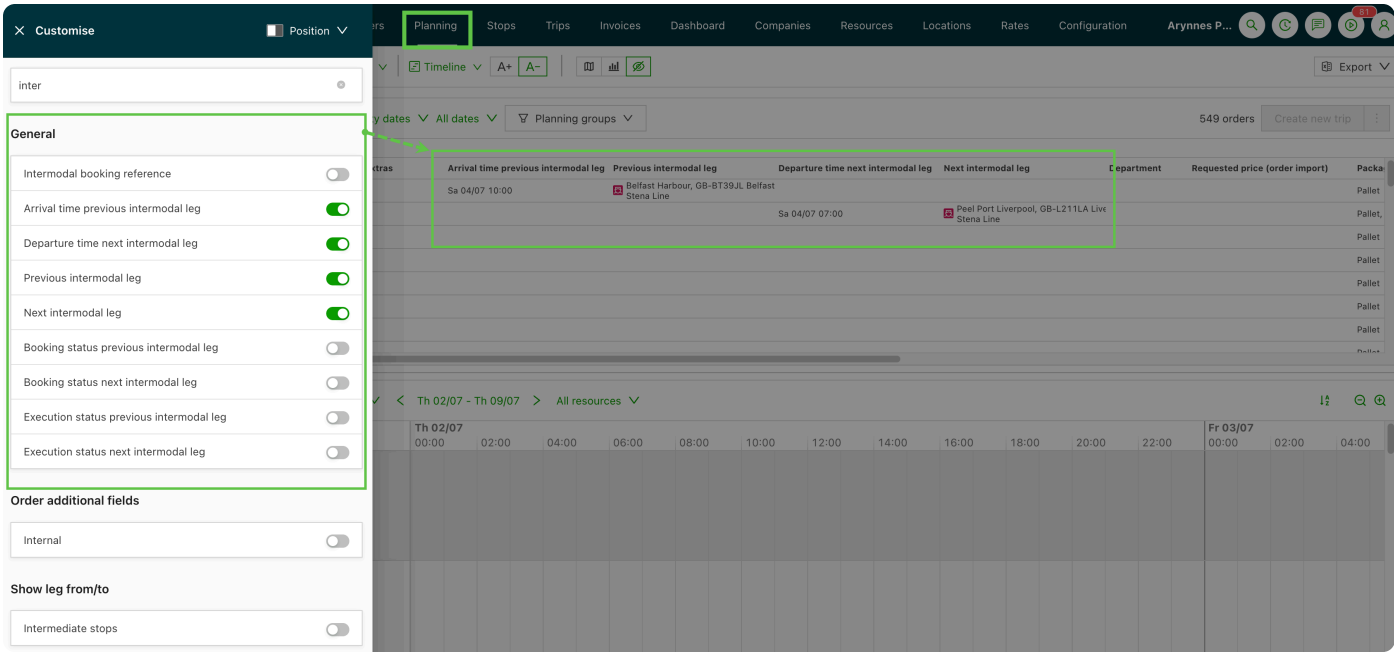

---

Container-trailer locations dashboard

📋 Planning — Previous & next intermodal connection columns

Intermodal timing, locations, and operator statuses are now visible directly in the planning view, without opening individual orders. Eight new opt-in columns show the previous and next intermodal legs with departure/arrival times, locations, booking status, and operations status. All of them are sortable and filterable.

What's included:

- Arrival time, location, and operator of the previous intermodal leg
- Departure time, location, and operator of the next intermodal leg
- Booking and operations statuses for both connections
- All columns sortable and filterable
- Available in the **Planning > To plan: Orders** view via Edit columns

Intermodal planning – Using previous & next connection columns
