Video – Load number, resources and customs columns in Intermodal view

Planners and CS running intermodal operations previously had to open individual orders and switch screens to find load numbers, next-leg resources, or customs references while working in the Intermodal view. Now, all data is grouped together on one screen.

Updated July 16, 2026

🎥 This video explains how to activate and interpret the intermodal columns:

> 🧰 The **Customs info columns must be activated by Qargo support** or the company's Qargo contact before they can be added to the intermodal overview.

More information on the intermodal view is available in this article: **Intermodal – Intermodal planning**.
