Feature release – August 2026

This article highlights the new features and enhancements Qargo released this month.

Updated October 8, 2026

Week 1

🧾 Invoices — Override the bill-to on orders and charges
🧾 Invoices — Auto-complete carrier invoice uploads for self-bills
📦 Rates - New package size conditions
🧮 Invoices — Consolidating fixed resource costs across loads
⚠️ Custom exports — Partial export warning
📄 Customer portal — Invoices and credit memos on the customer portal
📍 Customer portal — Share planned & actual load times on the portal
📊 Customer portal — Excel and CSV order exports

Week 2

🛰️ Mobile app — Location tracking for QR/PIN driver sessions
✅ Mobile — One question per goods line for good-level questions
🔎 Orders — Filter orders by pickup or delivery date
📦 Orders — Add and use the Packaging column
📍 Orders — Show every intermediate stop on Orders and To plan

Week 4

🔎 Orders — The new Packaging column in the Orders list
⚙️ Orders — Pickup and delivery date defaults
📦 Orders — Prefill packaged item fields from a product
📅 Orders — Requested dates and times when adding a shipment
🔄 Orders — Empty pallet swaps at stop level
📄 Invoices — Configurable row sort order in document templates
