Video: how to customize the planning board layout?

The planning board supports fully custom layouts. Instead of one fixed view, planners can split their screen into different arrangements and assign any planning component to any block. Layouts can be edited or deleted from the same toolbar selector.

Updated October 7, 2026

This video shows how to set up, save, use, and edit custom planning boards:

‼️ Two different customized planning boards cannot be open in two different tabs. If the view is changed in one tab, the change is also applied to the other tab.
