Video: How to remove a resource from a load without unplanning the load?

Removing an order's assigned resource doesn't mean unplanning the whole load. On a multi-order load, it now opens a confirmation modal offering "Unplan order from load" (just this order) or "Unplan load" (everything).

Updated October 7, 2026

This video shows how to remove a resource without unplanning the whole load:

‼️ This applies only to the order's resource X in the Orders list and in Operations. The three-dot menus on Load detail and the planning board still work exactly as they did before.
