Feature release - October 2026

This article highlights the new features and enhancements released by Qargo this month.

Updated October 30, 2026

Week 1

📄 Locations - Add documents to a location, shared automatically with drivers
🔀 Locations - Transport networks: Choose the split activity
🔎 Planning - Filter the Stops view by stop activity
📦 Orders - Split goods and keep existing barcodes

Week 3

📄 Qargo Intelligence — Create multiple orders from a single scanned document
📦 Planning — See trailer capacity used after each stop
🚚 Planning — Add orders to an existing matching load with Auto Assign
💰 Invoices — Set an Invoice from date on orders
📱 Mobile — Prefill question path answers with the existing Qargo value

Week 4

🎨 Customer portal — Add a carrier logo to the customer portal
📤 Customer portal — Create orders in bulk from an Excel or CSV file
💰 Invoices — Complete a stuck post task
📋 Orders — Copy an order with all its stops
🌡️ Stops — Temperature columns on the Stops view
💬 Configuration — Add comments on customers, contract carriers, drivers, and vehicles
